Waterfall Contemplation		Acrylic	76cm x 122cm (30" x 48")	\$1150

## Artist's Statement - Teresa Myat Berg

### COSMIC GARDEN

I often contemplate and wonder about the universe, our existence, where it all began and what other amazing life there could be.

This exhibit captures a part of my imagination where I see the inter-connection of our world to a wonderful place that is surrounded by unusual birds and botanical plants. I have named this beautiful place the "Cosmic Garden".

For my exhibition, I have used oils and acrylic paints. With oil paintings, I have a preliminary subject matter and complete a sketch prior to the painting. When I use acrylic paints, I paint intuitively. That is, I throw paint, splatter and make marks onto a blank canvas, building up layers until an image emerges. I then use this image to set the scene for the rest of the painting.

When I paint intuitively, there are no preliminary sketches or subject matter in mind. What generally manifests in these paintings are my feelings, emotions, experiences and the inspirations that have had an impact on me.
